

# ABSTRACT

A drug product which can maximize the effect of a  
cholestanol glycoside useful as an anticancer agent. The  
present invention provides a liposomal composition containing  
5 a glycoside exhibiting antitumor activity, a phospholipid,  
and a positive-charge-providing substance; the glycoside  
being composed of GlcNAc-Gal-, GlcNAc-Gal-Glc-, Fuc-Gal-,  
Gal-Glc-, or Gal- as a sugar moiety, and a hydrophobic  
compound capable of forming a liposome.
